

Manufacturer declaration

on materials and components in accordance with § 14 TrinkwV

We hereby declare that all components of the turbidity sensors

EXpure 191

that come into contact with media exclusively consist of materials that are suitable for drinking water applications. Corresponding declarations and certificates from raw material and component suppliers are available for us.

Materials that come into contact with media include:

- Flow-cell made of PE-HD
- EPDM seals
- Optics made of stainless steel 1.4435 (316L) and sapphire

This declaration is made by the manufacturer:
