

# Declaration of compliance

**in accordance with  
regulations (EG) 1935/2004, 10/2011/EU and (EG) 2023/2006**

We hereby declare that the following groups of devices

**EXspect  
EXcell  
EXplore  
EXpure**

meets the requirements for compliance with the above regulations.

The main focus of the regulations is on traceability and good manufacturing practice.

The general requirements are realized by purchasing parts – with potential food contact – consisting of materials, that meet FDA requirements. For materials where no CFR of the FDA is applicable, we have alternatively clarified the suitability through a "no – objection letter" from the Public Health Service of Food and Drug Administration.

Another aspect of good manufacturing practice for us is ensuring the traceability of items with potential food contact throughout the entire manufacturing and distribution process, which we consider to be realized through our quality management system in accordance with DIN EN ISO 9001:2015 and unique serial numbers for each device.

This does not release the customer from checking the suitability of our products for the intended use. This declaration applies exclusively to the listed products and accessories as supplied.

This declaration is issued by the manufacturer.
