ECI-01 EXspect Communication Interface

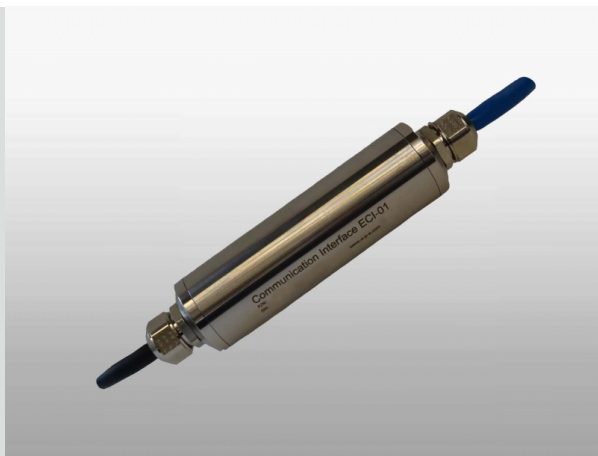

» Compact and robust design
» Simple and fast sensor parameterization
» Direct reading of the measured data via PC
» Operation of Exner compact sensors
» Performing test measurements outside the process

The ECI-01 is a communication interface for Exner sensors. Depending on the version, the sensors of the EXspect or Excell series can be parameterized or operated via a PC with USB interface.

Specifications

Article number:	2-120-66-001
Connection PC:	USB
Connection sensor:	M12 8-pin
Dimensions housing:	80x23 mm
Housing material:	Stainless steel
Length of connection cable:	2 m
