

ECI-01 EXcell Communication Interface

- » Compact and robust design
- » Simple and fast sensor parameterization
- » Direct reading of the measured data via PC
- » Operation of Exner rod sensors in laboratory applications
- » Performing test measurements outside the process

The ECI-01 is a communication interface for Exner sensors. Depending on the version, the sensors of the EXspect, EXpure or EXcell series can be parameterized or operated via a PC with USB interface.

Specifications

Article number:	2-120-69-004
Connection PC:	USB
Connection sensor:	Fischer Core Series
Dimensions housing:	80x23 mm
Housing material:	Stainless steel
Length of connection cable:	2 m

Dimensions
